**What Happens to Paper When We Put It Into Recycling Bins?**

Where does paper go after you put it in the recycling bin? First, the garbage man takes the paper to the recycling center. At the recycling center, workers sort the paper by type and remove any trash, metal, glass, or plastic that is attached to the paper. They sort paper and then take them to a paper mill where recycled paper is made. There, it becomes a material called pulp. A machine cleans the pulp to remove ink and dirt then flattens the pulp into sheets. The sheets of pulp then dry. These dried sheets are recycled paper! You can find recycled paper everywhere – from your school notebook to toilet paper!

**Easter Bunny**

The Easter Bunny is a traditional holiday character in the form of a young rabbit. It is said to have been created by German Protestants in the 16th century as a symbol of spring and new life. The bunny is often depicted as a young girl in a bonnet and apron, carrying baskets of eggs. In some regions, the bunny is said to be the one who delivers the Easter eggs to children's bedrooms on the night of Easter Eve. Many families participate in the ritual of the bunny visiting their children's bedrooms on the night of Easter Eve.

The Easter Bunny has its origin in pre-Christian Celtic and Germanic traditions. The bunny was the symbol of fertility and new life. The bunny was also associated with the sun and the spring. The bunny was often depicted as a young girl in a bonnet and apron, carrying baskets of eggs. In some regions, the bunny is said to be the one who delivers the Easter eggs to children's bedrooms on the night of Easter Eve.
