TOEFL originally stood for "Test of English as a Foreign Language," but now it simply stands for TOEFL. The test measures a test-taker's mastery of the English language and is primarily used by universities as part of the admissions process for non-native English speakers. A short history of the TOEFL reveals its creation in 1963, with its official name being the Test of English as a Foreign Language, commonly abbreviated to TOEFL. The original TOEFL was completely multiple choice and tested students on their reading, listening, and grammar skills. In 1979, the TOEFL was revised, adding optional tests focusing on writing and speaking skills called TWE and TSE. The first computer-based version of the TOEFL was released in 1998 as the TOEFL CBT, which later became the TOEFL iBT in 2005. The TOEFL iBT combines reading, listening, speaking, and writing sections into a single exam taken on the computer. The TOEFL is administered in over 130 countries and has been taken by over 30 million people. Other common TOEFL abbreviations include TWE, TSE, and CBT. paraphrased text here The updated TOEFL Integrated Writing Task is designed to test your ability to analyze a passage and respond to a lecture with well-supported arguments. To prepare for this task, it's essential to familiarize yourself with the materials you'll be using. The reading passage will typically present an argument or describe a process, while the lecture will challenge or expand on this information. You can find authentic practice materials in official TOEFL resources or online tools like Magosh. The question you'll answer is usually one of several formulas, which require you to summarize the points made in the lecture and explain how they respond to specific points in the reading passage. The most common types are those that challenge or contrast with the reading passage. You have 20 minutes to plan and write your essay, which should be around 150-225 words. To excel at this task, it's crucial to draw from both sources and make connections between them while listening. Take notes on the important points in the reading passage before listening, and then take notes that relate to these as you listen. This will help you create a clear and well-structured essay with specific examples and supporting reasons. Typical TOEFL Integrated Writing topics are often scholarly in nature, covering subjects such as consumer spending habits, historical events, or scientific debates. These topics usually stem from academic settings and might not be contemporary. By practicing with authentic materials and following the given guidelines, you can develop your skills and improve your chances of success on this task. These more modern topics are much more common in the TOEFL Academic Discussion Writing task that comes next. As you can see, success in TOEFL Integrated Writing is not just matter of writing, but also comes to reading and listening. For more tips on these two skills in TOEFL Writing Task 1, read the following blog posts: How should you structure your TOEFL Integrated Writing task? Even though the 20 minutes you have to write the integrated essay will fly by, it's still worth take a minute or two to write an outline of your own prior to beginning your response (the test proctor will provide as much scratch paper as you need). Even jotting just a few lines that connect parts of your notes and circling the main examples you want to cover will give you the guidance you need to stay on task when writing your response. Below I've written an outline that demonstrates an effective way to organize your answer on the exam when responding to TOEFL Integrated Writing topics. I highly recommend that you practice writing with this outline as your guide, at least at first. Once you've gotten some feedback and have some good practice under your belt, you can deviate from it. At first, though, it's good to know the rules before you break them, and to have a structure you can rely on when test day comes. Note that this outline template involves a lot of paraphrasing. Before you get started on making a practice outline of your own, be sure to check out Magosh's tutorial on paraphrasing in TOEFL Integrated writing. I. Introduction A. General statement about the relationship between the resources you heard and read. B. Short description of the way to organize the lecture II. Body A. Paragraph on first point 1. Paraphrase the professor's point 2. Contrast/compare with the reading 3. Give extra detail and additional specific examples on the professor's point (optional) B. Paragraph on second point 1. Paraphrase the professor's point 2. Contrast/compare with the reading 3. Give extra detail and additional specific examples on the professor's point (optional) C. Paragraph on third point 1. Paraphrase the professor's point 2. Contrast/compare with the reading 3. Give extra detail and additional specific examples on the professor's point (optional) III. Conclusion A. Restate the relationship between the two sources (optional) Note that you don't have a conventional essay structure here. There is no thesis statement, and the difference between a body paragraph and introductory paragraph is less pronounced. When responding to TOEFL Integrated Writing topics, you also don't have a concluding paragraph per se. If you're having trouble picturing exactly what this looks like, you can see an example task and model answer at the bottom of this post. You can also see some sample essays for this task in the official TOEFL Writing practice set PDF from ETS. (And this PDF contains TOEFL Writing samples for task 1 as well!) Above all, remember that the key to a good essay here is simply to take good notes on what you read and hear, and translate those notes into a full essay. This underscores the comic strip's status as a quintessentially American art form. Interestingly, this phenomenon raises questions about how American culture impacts global comic strips. The benefits of registering early for the TOEFL exam are numerous, and they can be broken down into several key points. Firstly, candidates who register six months in advance are no longer subject to fees if they change their exam date, time, or venue within a four-day window. This flexibility is especially helpful for those with variable schedules. Additionally, the registration system allows test-takers to view and compare existing test times and dates at various centers, making it easier for them to choose an option that best suits their schedule. Furthermore, the registration process has been streamlined to make it more efficient and convenient for candidates. By visiting the official website, clicking on "Test Taker," creating a new profile, filling out the test application form, choosing the desired test date and centre, paying the fee, confirming the details, and submitting the application, candidates can successfully register for the TOEFL exam. It is also essential to be aware of the TOEFL test fees, which vary depending on the type of test being taken. The registration fee for the TOEFL PBT is \$180, while the registration fee for the TOEFL iBT ranges between \$160 and \$250. It is recommended that candidates are familiar with the exam fees prior to attempting to register. The cost of the exam must be understood by applicants in India, as it includes various fees such as test fee, home edition registration fee, rescheduling fee, reinstatement of cancelled scores fee, additional score reports fee, speaking or writing section score review fee, and returned payment. In case a candidate finds that TOEFL Exam is not relevant, they can also consider IELTS Exam to check their language proficiency. It was first introduced in 2005 in Germany and Italy, and later in the rest of the world in 2006, with new test centers being added regularly. Test-takers may take notes while they listen and refer to them when answering questions. The speaking section tests the candidate's ability to speak fluently and express ideas clearly in response to familiar topics or by combining information from passages and talks. In this practice test, you can review sample responses and compare them to your own writing. For the first task, you'll read a passage, listen to a lecture, and then answer a question that requires you to link the reading and listening material. You'll have 20 minutes to write a response, typically around 150-225 words in length, and focus on using information from both sources without expressing your personal opinion. However, critics argue that Chevalier de Seingalt's memoir is unreliable due to its inaccuracies. They point out that the Chevalier's claims of wealth and lavish spending in Switzerland are contradicted by evidence showing he actually borrowed money from a merchant there. Similarly, his recorded conversations with Voltaire are likely fictionalized for dramatic effect, given their impossibility to recall exact phrases after many years. Moreover, critics question the account of the Chevalier's daring escape from prison in Venice, suggesting it was more likely a bribe facilitated by his influential friends. Now, you'll be presented with a question asking you to summarize the lecture and explain how its points cast doubt on those made in the reading passage. You have 20 minutes to write your response, which should include at least 150-225 words. To evaluate your writing skills, you can compare it to sample responses provided. In his memoir, the Chevalier asserts that during his stay in Switzerland, he was affluent, with substantial expenditures on lavish events and gambling. Yet, recent findings reveal he took significant loans from a Swiss merchant. Consequently, critics question his financial status, suggesting true wealth would not necessitate borrowing. Doubts also

The test consists of four sections: listening, speaking, reading, and writing, each designed to evaluate a specific aspect of the candidate's language skills. Candidates have 7 hours and 35 minutes to complete the entire test. Test-takers are given a short preparation time before beginning the test, and their responses are digitally recorded and sent to ETS's Online Scoring Network (OSN) for evaluation by three to six raters. The writing section consists of two tasks: one integrated and one independent, requiring candidates to write summaries and essays based on academic passages. The TOEFL iBT Home Edition is an at-home test version that has gained popularity during the COVID-19 pandemic due to lockdowns. However, some students experience technical issues, including unreliable testing software and slow complaint processing. The Home Edition is essentially the same as the standard TOEFL iBT but administered remotely. There are two main types of tests: the internet-based test (iBT) and the paper-delivered test. The paper-delivered test consists of the listening, reading, and writing sections with scores on the same scale as the iBT. However, it is typically only available in limited areas and may require rescheduling. The TOEFL PBT was discontinued in 2017, replaced by the paper-delivered test. Test-takers can have their scores sent to institutions or face time, which are valid for two years after the test date. Additionally, there are accommodations available for students with disabilities, including screen magnification, special keyboard settings, and oral interpreters. Candidates must request these accommodations in advance through ETS's Disability Services team. The TOEFL iBT test is a widely used English proficiency exam, scored on a scale of 0 to 120 points, with each section contributing to the total score. The reading and listening sections are tested first, followed by a ten-minute break for the speaking and writing sections. The test has a maximum time limit of 203 minutes. The TOEFL PBT score ranges between 0 and 677 and is based on three subcores: Listening (0-68), Structure (0-68), and Reading (0-67). #####ARTICLETOEFL iBT Score Comparison Tables with other English language proficiency tests.
